# ABOUT OUR COMPANY

---

**ARMED GROUP is a specialized B2B construction and finishing contractor delivering corporate, administrative, governmental, and petroleum sector projects across Egypt. With proven experience working with multinational companies and sensitive operational facilities, we focus on controlled execution, strict compliance, and reliable delivery under complex and time-sensitive conditions**

# VISION & MISSION

## vision

To be Egypt's trusted leader in construction and integrated fit-out services by delivering certified, high-quality, and fully compliant projects — combining engineering excellence, safety standards, and advanced technology to serve both public and private sectors.

## Mission

Our mission is to provide turnkey construction and fit-out solutions that meet the highest national and international standards — by aligning with certified management systems, using modern technologies, and ensuring full legal, environmental, and safety compliance from design to delivery.

# core services

## Corporate Construction

---

Execution of administrative and operational buildings for corporates, governmental entities, and energy sector clients — delivered under strict quality, safety, and compliance standards.

## Corporate Fit-Out & Rehabilitation

---

Turnkey fit-out and rehabilitation works for headquarters, executive offices, and operational facilities, with full architectural and MEP coordination.

## Corporate Maintenance & Facility Support

---

Long-term maintenance and facility support services designed to protect assets, ensure business continuity, and support future expansion

# Sector Experiance

## Multinational Corporations

Execution aligned with international corporate standards -  
Strong experience working within live operational  
environments - High compliance, safety, and reporting  
discipline

## Petroleum & Energy Sector

Exposure to petroleum-related facilities and administrative  
buildings - Strong understanding of governmental approvals  
and safety protocols - Trusted execution within sensitive and  
regulated environments

# why Armed Group

- Proven experience with multinational and petroleum sector clients
- Ability to execute projects inside operational and sensitive environments
- Strong documentation, reporting, and compliance culture
- Certified engineers and controlled site management
- Reliable delivery under tight timelines and complex coordination

# MINISTRY OF PETROLEUM

**Client:** Ministry of Petroleum

**Sector:** Government / Energy

**Location:** Egypt / nasr city

**Scope of Work:** Rehabilitation and upgrading works for an existing governmental building serving petroleum sector operations

# MINISTRY OF PETROLEUM

## Key Challenges:

- Working within an active governmental facility
- High compliance and approval requirements

## Our Role:

- Execution management, coordination, and delivery in alignment with governmental and safety regulations.

## Outcome:

- Project delivered with full compliance and successful handover to the operating authority.

# Republican Guard Officers Club

**Client:** Republican Guard Officers Club

**Sector:** Government / Military Facilities

**Location:** Egypt

**Project Overview:**

Design and construction of soldiers' accommodation barracks within the Republican Guard Officers Club.

The project aimed to deliver functional, durable, and well-organized living facilities that meet military operational and discipline requirements.

**Scope of Work:**

- Architectural and functional design of soldiers' barracks
- Full construction and civil works
- Structural execution and finishing works
- Coordination of all site activities and construction phase

# Republican Guard Officers Club

## Key Challenges:

- Compliance with strict military and governmental standards
- Delivering durable solutions suitable for intensive daily use
- Managing execution within a controlled and secure environment
- Ensuring efficiency, discipline, and clarity in site operations

## Our Role:

- End-to-end responsibility including design development, construction execution, site supervision, coordination, and quality control, ensuring alignment with the client's technical and operational requirements.

## Outcome:

- Successful delivery of fully constructed and operational soldiers' barracks, providing practical, reliable, and compliant accommodation facilities aligned with military standards and functional needs.

# Republican Guard Hospital

**Client:** Republican Guard Hospital

**Sector:** Government / Healthcare Facilities

**Location:** Egypt

**Project Overview:**

- Upgrading and architectural modification works for the Republican Guard Hospital, aimed at improving operational efficiency, functionality, and overall facility performance while maintaining continuous medical operations.

**Scope of Work:**

- Architectural modifications and space reconfiguration
- Upgrading of existing facilities and infrastructure
- Finishing works and interior enhancements
- Coordination of execution activities within an active healthcare environment

# Republican Guard Hospital

## Key Challenges:

- Executing works within a fully operational hospital
- Ensuring compliance with governmental and healthcare standards
- Minimizing disruption to medical services and patient flow
- Managing phased execution under strict security and operational constraints

## Our Role:

- Turnkey execution including planning, architectural modifications, site management, coordination, and quality control, ensuring seamless integration with the hospital's ongoing operations.

## Outcome:

- Successful completion of upgrade and modification works, enhancing hospital functionality, efficiency, and readiness while maintaining uninterrupted healthcare services.

## Republican Guard Al Qanater Accommodation Project

**Client:** Republican Guard – Al Qanater Facility

**Sector:** Government / Military Infrastructure

**Location:** Al Qanater, Egypt

### **Project Overview:**

Design and construction of accommodation barracks for soldiers and officers within the Republican Guard premises at Al Qanater, executed in compliance with military infrastructure requirements and security standards.

### **Scope of Work:**

- **Architectural and execution design**
- Construction of soldiers' and officers' accommodation barracks
- Structural works including concrete foundations and slabs
- Internal finishing works
- Site coordination and execution management
- Full handover upon completion

## Republican Guard Al Qanater Accommodation Project

### Key Challenges:

- Execution within a secured military facility
- Strict compliance with government and military construction standards
- High level of coordination and controlled site access
- Delivery within predefined timelines and specifications

### Our Role:

- Turnkey execution covering design, construction, structural works, finishing, site supervision, coordination, and quality control.

### Outcome:

- Successful delivery of fully functional accommodation barracks meeting operational, security, and durability requirements of the Republican Guard.

# Atos

## ATOS (PHASE 1&2)

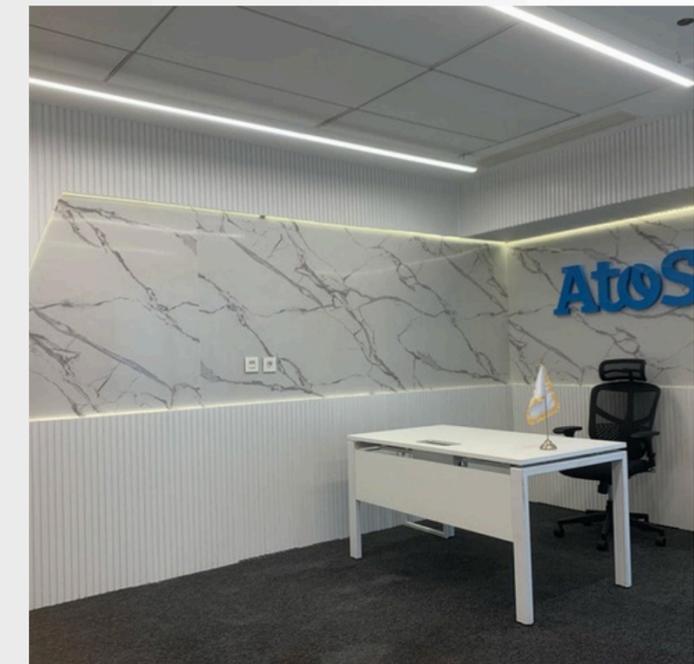

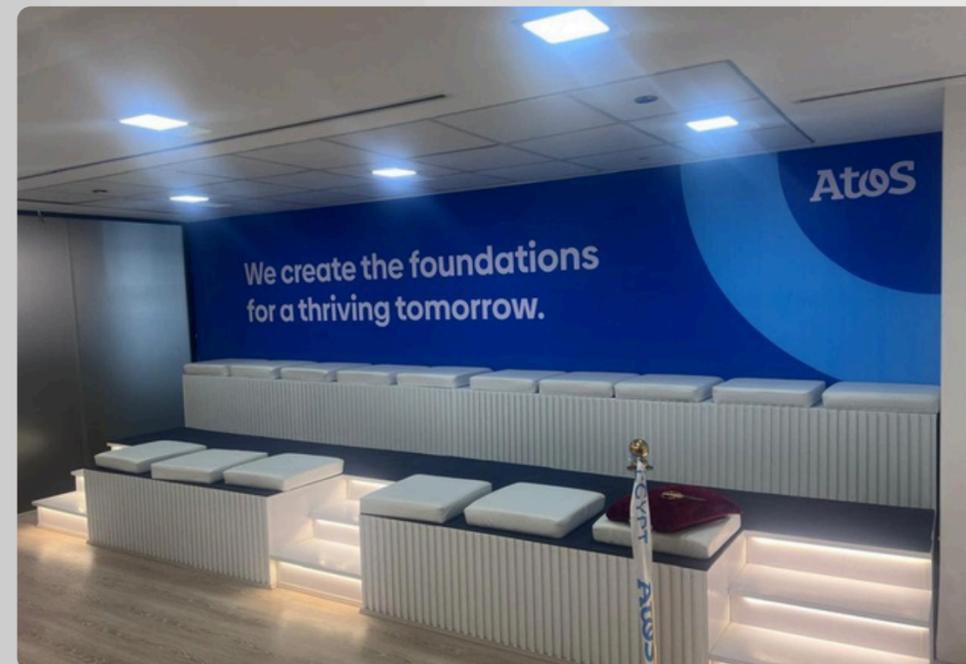

**Client:** ATOS – Multinational / Technology

**Sector:** Corporate / Technology

**Location:** City Stars – Cairo

**Area:** ~5,000 m<sup>2</sup>

**Scope of Work:** Full corporate fit-out works including finishing, coordination of MEP interfaces, and execution within an operational commercial environment.

# Atos

## ATOS (PHASE 1&2)

### Key Challenges:

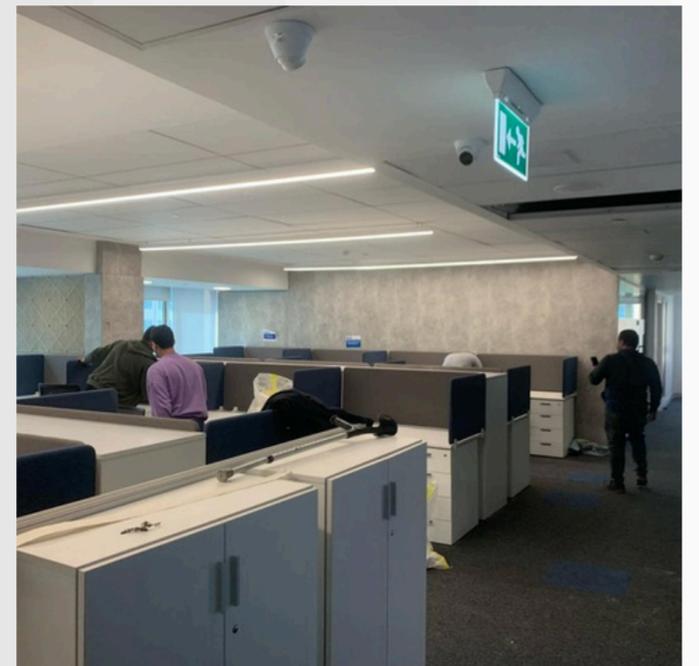

- Execution inside an active mall and business complex
- Strict timeline and operational constraints
- Coordination with multiple stakeholders

### Our Role:

- turnkey execution, site coordination, quality control, and delivery in compliance with corporate standards.

### Outcome:

- Successful handover within schedule while maintaining uninterrupted operations.

## PETROSAFE

**Client:** Petrosafe

**Sector:** Petroleum Services

**Location:** Egypt / El Sherouk city

**Scope of Work:** Fit-out and preparation of the administrative headquarters to meet corporate operational requirements.

## PETROSAFE

### Key Challenges:

- Aligning execution with petroleum sector standards
- Delivering within an active corporate environment

### Our Role:

- Turnkey execution, coordination, and controlled delivery.

### Outcome:

- Fully operational headquarters delivered according to client standards and timeline.

## GIZA SYSTEMS

**CLIENT :**Giza Systems

**Sector:** Multinational / technology  
&Engineering

**location:** 90s Street first settlement

**Scope of Work:** Upgrade and modification  
works for executive management offices.

# GIZA SYSTEMS

## Key Challenges:

- Working within an active corporate environment
- Maintaining privacy and operational continuity

## Our Role:

- Execution, coordination, and controlled delivery.

## Outcome:

- Executive offices delivered with minimal disruption and full alignment with corporate standards

Petroleum Marine Services Co.  
شركة خدمات البترول البحرية

## Petroluem Marine Service co.

**Client:** Petroleum Marine Services (PMS)

**Sector:** Petroleum / Marine Services

**Location:** Egypt / fifth settlement

**Scope of Work:** preparation and fit-out of the administrative headquarters supporting (pms)

Petroleum Marine Services Co.  
شركة خدمات البترول البحرية

## Petroluem Marine Service co.

### Key Challenges:

- Compliance with petroleum sector standards
- Coordinating execution within an operational corporate structure

### Our Role:

- Turnkey execution, site management, coordination, and quality control.

### Outcome:

- Successful delivery of a fully functional administrative facility aligned with client operational requirements

## Petroluem Marine Service co.

**Client:** Tebin–Sokhna Gas Pipeline Project

**Sector:** Energy / Oil & Gas Infrastructure

**Location:** Egypt

### **Project Overview:**

Design and construction works for the Tebin–Sokhna Gas Pipeline, delivering a fully integrated infrastructure solution from initial excavation to final handover.

### **Scope of Work:**

- Engineering design and execution planning
- Excavation and trenching works
- Concrete works including foundations and structural concrete casting
- Pipeline corridor construction and related civil works
- Backfilling, surface restoration, and finishing works
- Full site coordination and final handove

## Petroluem Marine Service co.

### Key Challenges:

- Execution within an active energy infrastructure environment
- Compliance with oil & gas safety and quality standards
- Managing heavy civil works across extended pipeline routes
- Coordination between multiple construction phases and stakeholders

### Our Role:

- End-to-end execution covering design, civil works, concrete casting, site management, coordination, and quality assurance until final delivery.

### Outcome:

- Successful completion and handover of the gas pipeline works, delivered in compliance with energy sector standards, ensuring durability, safety, and operational readiness.

# Konnecta

## konecta

**Client:** konecta

**Sector:** Corporate / Professional Services  
(Multinational)

**Location:** New Cairo – North 90th Street, Egypt

**Scope of Work:**

Preparation, reconfiguration, and full fit-out of the corporate headquarters, including architectural modifications, interior finishing, furniture, branding, logos, and required procurement

# Konnecta

## konecta

### Key Challenges:

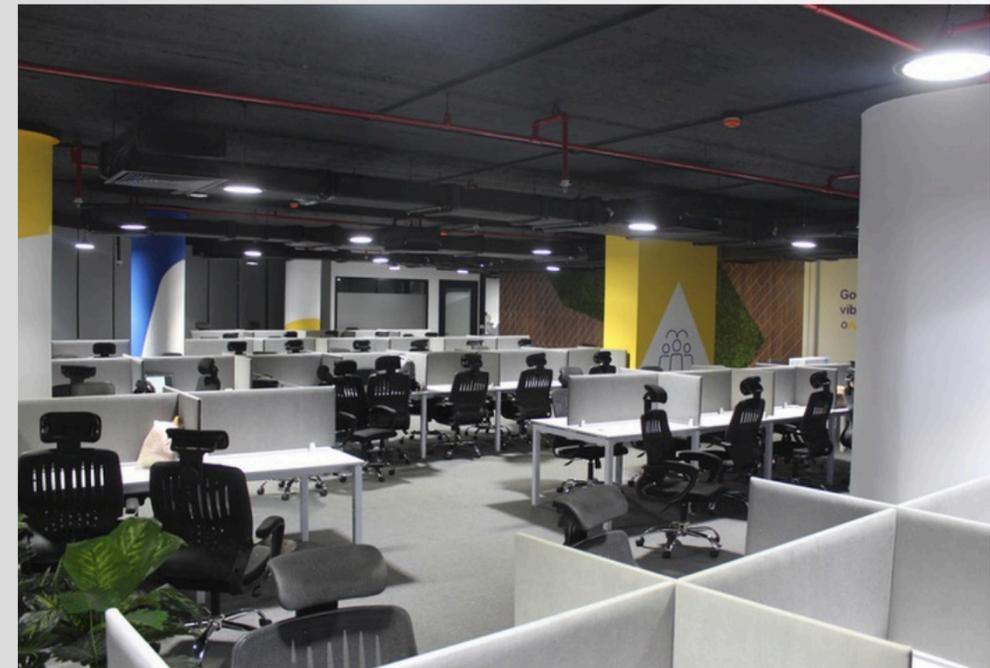

- Delivering a multinational-standard office environment
- Integrating branding and corporate identity across all spaces
- Executing works within an existing operational structure

### Our Role:

- Turnkey execution, architectural reconfiguration, finishing works, furniture supply, branding implementation, procurement coordination, site management, and quality control.

### Outcome:

- Successful delivery of a fully integrated corporate headquarters aligned with CONNNECTA's multinational standards, operational needs, and brand identity.
